RMSSD: 23.6 (2.4)	Abnormal: 0.0 (0.0)
SDSD: 31.0 (2.4)	Abnormal: 0.0 (0.0)
COMMENTS:	

## Description

An enabling piece of web-based technology for many of NorthEast Monitoring's products. LX Remote moves data between a remote site and a central analysis site. Designed to provide HIPAA-compliant, secure, digital methods to move ECG data from the remote location to the analysis location and then return the pdf report files back to the remote location. Developed to make management and deployment as easy as possible. No need to load software applications or plug in hardware (USB) keys at remote sites. A cost saving for scanning services and other multi-location service providers.

## Features

- Web-based application
- Assign Administrator, Technician and Remote User accounts
- HIPAA-compliant data management and transport
- Securely handle Holter, Event and report data
- Automatic generation of Private / Public Key pairs
- Vulnerability analysis
- NARP (NorthEast Automated Retrieval Process) simplifies setup and file transfer

## Applications

- NorthEast Holter Files
- NorthEast Event Files
- Report PDF files returned to users

## Availability

- Annual license includes support
- Contact us for European availability
