

# QRS-Blue™ Wireless Digital ECG System

The QRS-Blue Wireless Digital ECG is a 12-lead ECG device able to record and transmit real-time ECG data using Bluetooth technology to any PC, laptop or tablet.

QRS-Blue used with QRS-Card Cardiology Suite can turn your standard computer into a full functioning resting or stress cardiology system.

## FEATURES:

- Option of Bluetooth (wireless) connection or USB (wired) connection
- Battery power indicator light
- 20 hours of battery life on 2 AA batteries
- Batteries not required in 'wired' mode
- Pacemaker detection
- Up to 10 foot range
- EMR connectivity
